Why use ROCS Pools

- ROCS is a Modular Prefabricated System, manufactured off-site, supplying exceptional quality and efficiency.
- Built-in Releveling Capability. The ROCS Relevelable overflow channel system can be relevelled should an earthquake or ground settlement occur, restoring a seamless overflow to your pool.
- Engineered using PVC Laminated Stainless Steel panels, offering a complete waterproofing system and captivating finish in a single package.
- Crafted Locally. ROCS pools are proudly manufactured in New Zealand, ensuring swift delivery and unparalleled backup support and service.
- Packaged with a Reinforced PVC membrane for a complete waterproofing system with optional Poly Extruded Matting (PEM) for a soft pool floor.
- Cost effective alternative to conventional concrete and existing modular pools.
- Minimised excavation and backfill expenses, thanks to the absence of buttress systems or pool deck support structures.
- Enhance the aesthetics of your pool area with an optional matching Stormwater Drainage gutter, Streamlining water drainage on the pool deck.
- Versatile across pool types; the ROCS system is suitable for Community, Hotel, Resort, Competition, Leisure, and Domestic swimming pools alike.
- Improving swimmers' comfort by reducing wave splashback.
- Comes with stylish finger grip waterline tiles and Grate-Tech overflow channel grating.

ROCS Tailored Design

The elegant overflow channel system of ROCS Pools offers versatile installation options. It can be positioned along the entire perimeter of the swimming pool tank, spanning both lengths of the pool or even just along a single length, the ROCS Pools channel can be tailored to your pool and water circulation design.
